

Rule Changes 2019 - Proposals Trick Discussion

Cableski Council

05.02.2019

Martin Graw

2019 Trick Timing

- We want to get rid of timing !
 - No delay due to judge decisions
 - Less Protests
 - Higher Result Accuracy
 - Less Technology and less technical fail
 - Less Judges and no Operator

New Trick Procedure for 2019

4					
		from Pulley 1 to Pulley 2		1 Counted Pass	
				Prelim	Final
14 first tricks will be calculated	declared but flexible, a repeated trick can score - but will be counted within the 14 first tricks		1	1 plus 2nd chance (could be a repeated pass or completely different)	

Generally Positions (standard basic 180 turns hand and toehold) will not count to the first 14 Tricks except :

- 1) You do minimum 2 consecutive 180 basic tricks (eg. a Front and a Back)
- 2) If you have positions within the first 14 Tricks when have fall or the tricks run ends at the pulley
Skier may offer 2 different declared passes for the final to the calculator before start

Alexander Isaev is in discussion with skiers about the Trick Values

- Value of Tricks need to be balanced, we don't want to have uniformity trick runs :
 - Toehold higher ?
 - Bodyover Higher ?
 - Higher points for more complex Tricks in general ?
 - Prepare Proposals on fully programs with todays values
 - Prepare comparable trick sequences
- Limitation to 6 Flips :
 - 6 Flips is a good balance out of 14 Tricks in total
 - Bad performed flips need to be penalized more strictly
- Beside the 2nd chance, we need to be faster in showing the results on the website of the passes in general, but we not wait for the second pass because of missing results

If you have interest to discuss the Trick Values for a good Balance, please contact your Skier Representative Alexander Isaev
