

## Rule Changes 2019 - Amendment 1Trickski

Cableski Council

04.08.2019

Martin Graw

## 2019 Trick Timing

- We want to get rid of timing !
  - No delay due to judges' decisions
  - Less Protests
  - Higher Result Accuracy
  - Less Technology and less technical fail
  - Less Judges
  - Video only for Replay

We specially want to thank Alexander Isaev the Skiers representative and all the Skiers who were actively involved in this discussion and for their agreement on these changes !

## Basic Changes decided for 2019:

- No timing anymore, Tricks can be performed from pulley to pulley
- The **First** 14 Tricks will count (instead of Best Tricks)
  - Position Tricks (180) are not counted unless you are doing 2 or more in a row
  - Skiers wish : Best 14 tricks, but then you have many tricks not well executed
- Only 1 counted pass
- In Preliminary you have only 1 pass
- In Finals you will have 2 chances, but still only one pass will count
- The Trick-points will be left unchanged for now
- There will be no limitation of Flips or any other Tricks for now

## **Amendment 1 : Clarification and Interpretation**

- Any Single 180 Trick (Position) will not be counted within the 14 valuable tricks
- Only in Case of a Trick run with less then 14 valueable Tricks a 180 Trick may be counted
- A TF, B or F, TB combination (change between Toehold and Hand) is not counted within the 14 valuable tricks
- A Trick which cause a Fall will be counted as valuable trick with Score Zero
- If judges decide a TF, TB combination instead of TBB not given, the Skier will receive the score for TF and TB, secondly it will be treated as 2 valuable tricks
- The caluculation program is working properly since end of July.
