## 2019 Who Beat Who Ranking List Calculation

- We want to update the WBW calculation base :
  - after 4 years we reviewed the factors
  - sometimes there are big changes on the general points just because of the number of high ranked skiers
  - sometimes there are big changes on the general points just because of the low number of participants
  - sometimes you receive a lot of points even if you finished last in the competition you cannot achieve on other comeptitions by 2 or more wins.

We specially want to thank Robin Senge who was actively involved in this discussion on these changes !

## Basic Changes decided for 2019 :

- No Adaption on Competiton/Homologation Levels Factor :

Homologation Level	Factor
WORLD and Region CHAMPIONSHIPS	1.0
Regional age category Championships	0.9
International homologated competitions	0.8
National homologated competitions	0.7
International not homologated competitions	0.6
National not homologated competitions	0.5

- This value left unchanged !

## Basic Changes decided for 2019 :

- Adaption on Skiers Level Coefficient-Factor :

Skies Participation at Competition	Factor
4 of best 10	1
4 of best 20	0.8
4 of best 40	0.6
4 of best 60	0.3
rest	0.1

- The adaption on this value will ensure the balancing due to the number of high level skiers participating even if we have low number of participants

## Basic Changes decided for 2019 :

- New Value for Skiers Participating :

Number of Skiers (Starters) per Event	Factor
20 plus	minus 10%
10 to 19	minus 15%
0 to 9	minus 20%

- This new value will decrease the number of points for the following places due the number of skiers, that the last skiers will receive only low number of points even if there is only a low number starting
- The percentage factor means : decreasing points from place to place by xx%
  - 1st Place : 1000
  - 2nd Place : 1000 -xx%
